Art Unit: 3652

### **DETAILED ACTION**

1. The amendment of 2/5/2001 has been received and entered. Claims 66, 71-72, 75-76, 78-79, 83, 86, 91-92, 94-95, 97-100, 106-131 are pending.
2. Applicant's declaration has been noted; it has overcome the Vazquez reference applied in paragraph

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 66, 71-72, 75-76, 78-79, 83, 86, 91-92, 94-95, 97-100, 106, 125 are rejected under 35 U.S.C. 103(a) as being unpatentable over Demers et al., U.S. patent 5,952,638. Demers shows a wireless device 40 which locates a sale location, identifies a transaction amount and transmits those transactions for customer verification. See Figs. 3-7. However, Demers shows only a single customer. The use of the Internet to deal with multiple parties simultaneously is notoriously well known. This scalability is one of the advantages of the Internet. The use of the system of Demers et al. to handle multiple customers simultaneously would have been obvious to one of ordinary skill in the art in order to have a commercially viable system.

Art Unit: 3652

With respect to Claim 71, the customer has identified the seller before the transmission on Col. 6 line 20.

5. Claims 106-124 rejected under 35 U.S.C. 103(a) as being unpatentable over Demers et al., above, as applied to claim 66 above, and further in view of Vazvan, WO 96/01531. Note that this is a different reference than the Vazvan reference previously applied.

Demers et al. does not show location determination by mobile computer. The '531 Vazvan reference teaches that the use of a mobile computer to provide location information which helps to control a wireless transaction is desirable. The use of position information to reduce the number of options available to the user of the Demers et al. Device would have been obvious to one of ordinary skill in the art in order to simplify the transaction as taught by Vazvan.

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

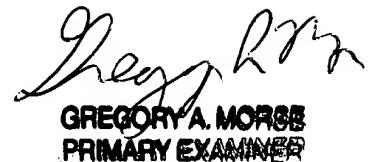

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3652

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Greg Morse whose telephone number is (703) 308-4789.
